

SAFETY POLICY

Essential Turbines' comprehensive safety approach integrates regulatory compliance, hazard controls, and clear employee expectations to create a secure work environment for all team members.

Regulatory Compliance & Monitoring

Our safety protocols strictly adhere to all federal, state, and local safety regulations including FAA and OSHA standards. We conduct regular compliance audits and promptly address any identified gaps to maintain full regulatory alignment across all facilities and operations.

Hazard Mitigation

We implement comprehensive risk assessment procedures to identify potential workplace hazards. Our engineering controls, administrative safeguards, and personal protective equipment requirements are strategically designed to minimize the risk of injuries, accidents, and occupational illnesses.

Employee Responsibilities

All team members are expected to follow established safety protocols, report unsafe conditions, participate in safety training, and actively contribute to our continuous improvement initiatives. Employees at all levels share accountability for maintaining our safety standards.

“SAFETY FIRST”
