QUALITY POLICY

Essential Turbines Inc. (ETI) is dedicated to remain the best in the industry. ETI specializes in the repair and overhaul of products for aerospace. The products are released under the most rigorous quality control processes. The company is recognized for its superior quality and services.

ETI is committed to repair and ship to its customers, without any undue delay, aerospace engines and components that satisfy all requirements at the best possible cost.

In order to achieve these goals, ETI relies on the experience, the collaboration and the continuous training of its personnel to remain at the peak of the latest technology.

The Company's Suppliers and Sub-Contractors have aligned themselves with our ultimate goal, which is to attain whole and lasting customer satisfaction.

ETI applies and maintains a Quality Management Program that conforms to the International Standard ISO 9001:2008 at all levels of the enterprise.

Management undertakes periodic reviews of its system so as to guarantee its continued efficiency and improvement.

In agreement with this Quality Policy, all personnel of ETI are fully committed to support and apply all aspects of the Quality Management Program.

Michael F. Guntner
President & Accountable Executive
